Feature

Traditional Pump vs SCALA2 Comparison

Stable Water Pressure

→ No pressure drops, even with multiple taps in use

Noise Level

→ Whisper-quiet operation, day and night.

Power Consumption

→ Lower energy. Higher efficiency..

Pressure Control

→ Perfect pressure with every use..

Leak Detection

→ Smart protection against water leaks

One Comparison. A Clear Winner.

The 5 Feature Comparison

A side-by-side comparison of the features that matter most.

Feature 1

• Stable Water Pressure

Traditional Pump

Water pressure gradually drops when more than one tap is opened

SCALA2

Stable pressure even when multiple taps are used at the same time (up to 8 taps)

Feature 2

• Noise Level

Traditional Pump

Loud noise (over 85dB), similar to a traditional vacuum cleaner

SCALA2

Very quiet operation (44 dB), similar to a modern dishwasher

Feature 3

• Power Consumption

Traditional Pump

Runs at full power constantly, resulting in high energy use.

SCALA2

Smart motor saves power by operating only when needed.

Feature 4

• Pressure Control

Traditional Pump

No control over pressure levels.

SCALA2

Customizable pressure settings between 1.5 to 5.5 bar

Feature 5

• Leak Detection

Traditional Pump

No leak detection in the system.

SCALA2

Detects and alerts you if there is a water leak.
