

TIME TO RETIRE THE OLD PUMP

Nine reasons the upgrade wins

The pump behind your taps has not changed in decades. Here is what changes when it does.

TRADITIONAL PUMP

GRUNDFOS SCALA2

Stable water pressure

✗ Pressure gradually drops when more than one tap is opened.

✓ Stable pressure even with multiple taps in use, up to 8 at once.

Noise level

✗ Loud, over 85 dB, similar to a traditional vacuum cleaner.

✓ Very quiet at 44 dB, similar to a modern dishwasher.

Power consumption

✗ Runs at full power constantly, resulting in high energy use.

✓ Smart motor saves power by operating only when needed.

Dry run protection

✗ Continues running without water, leading to damage.

✓ Stops automatically when water is cut off to avoid damage.

Easy installation

✗ Requires additional equipment, tanks and professional installation.

✓ Compact design with flexible connections, easy to install.

Maintenance

✗ Frequent maintenance and manual priming required.

✓ Self-priming and low maintenance.

Error detection

✗ No alerts, a technician is needed to identify issues.

✓ Clear warning indicators, no need for a plumber.

Pressure control

✗ No control over pressure levels.

✓ Customizable pressure settings between 1.5 and 5.5 bar.

Leak detection

✗ No leak detection in the system.

✓ Detects and alerts you if there is a water leak.

Make the switch

Upgrade to intelligent water pressure.
